Cybersecurity Analyst | AI Red Teamer & LLM Security | SOC & Blue Team | Incident Response

PROFESSIONAL SUMMARY

Cybersecurity MSc graduate (Oklahoma City University, GPA 3.7) with active contract experience in AI security, LLM red teaming, and AI agent evaluation for frontier-model training, alongside a hands-on background in SOC-style threat detection, vulnerability management, and M365 security administration. Maintains a public AI Evaluation & Safety portfolio on GitHub, holds the SC-900, AWS Cloud Practitioner, and Microsoft 365/Azure/AI fundamentals certifications, and is currently studying for CompTIA Security+. U.S. Green Card holder, eligible for Secret clearance.

CORE SKILLS & TOOLS

AI / ML Security: AI red teaming, LLM security testing, adversarial prompt design, AI agent evaluation, AI safety evaluation, reward hacking detection, OWASP Top 10 for LLM Applications

Security Operations: Threat detection, incident response, vulnerability assessment, SIEM (Splunk, Microsoft Defender), MISP threat intelligence, OWASP Top 10

Cloud & Identity: Microsoft Azure AD, AWS Cloud Practitioner, Microsoft Intune, MFA, conditional access, M365 security administration

GRC & Compliance: NIST, ISO 27001, HIPAA, risk assessment, policy documentation, access controls

Tools: Nessus, Nmap, Wireshark, Splunk, Microsoft Defender, MISP, Docker, GitHub, Streamlit

Automation & Scripting: Python, PowerShell, Bash

Systems & Networking: Windows, Linux, Active Directory, networking fundamentals, VPN

PROFESSIONAL EXPERIENCE

AI Evaluation & Safety Specialist — Independent / Contract

2024 – Present

Remote (United States)

- Active across multiple frontier-LLM evaluation and safety platforms — Alignerr, Mercor, Snorkel AI, Meridian (Invisible), RemoteXperts, and LinkedIn's expert verification program — covering AI red-teaming, prompt-injection assessment, AI agent evaluation (reward-hacking detection, evaluator-manipulation prevention), data annotation, and rubric design.
- Conduct quality-assurance audits of autonomous AI agent scenarios used in frontier LLM training: review YAML task specifications and rubrics, audit PASS/FAIL trajectories to verify legitimate task completion vs. reward hacking, and analyze execution logs for world-agent response consistency.
- Maintain a public AI Evaluation & Safety Portfolio (NDA-compliant) on GitHub for professional peer review: github.com/chima-ukachukwu-sec/ai-evaluation-safety-portfolio.
- Apply OWASP Top 10 for LLM Applications, the OWASP Agentic AI Top 10, and NIST AI RMF references to evaluate model and agent behavior across multiple frontier model families.

Cyber Security Expert Fellow (AI Safety & Evaluation) — Handshake · Contract

Sep 2025 – Jan 2026

Remote (United States)

- Collaborated with AI research teams to evaluate and harden the security and safety of large language models.
- Designed adversarial test cases targeting prompt injection, jailbreak, and behavioral manipulation; documented findings in NDA-compliant evaluation reports used to inform safety guardrails.
- Contributed selected workflows to a public AI safety evaluation portfolio on GitHub.

Cybersecurity Intern – Corporate Information Systems — Hobby Lobby

May 2024 – Aug 2024

Oklahoma City, OK · On-site

- Embedded with the corporate Network Security team on live threat-intelligence and security-operations initiatives.
- Built and documented a secure Docker environment for the MISP malware-information-sharing platform, enabling the team to ingest and operationalize threat indicators.
- Developed Python scripts to support security tool integration and data handling; participated in vulnerability scanning (Nessus) and secure architecture reviews.
- Presented project outcomes to senior IT staff and authored internal process documentation.

Technical Support Specialist – Microsoft Windows & Office 365 — Authorized Microsoft Support Vendor (via Upwork) · Contract

Jan 2021 – Sep 2024

Remote (United States)

- Provided enterprise-level technical support for Microsoft customers globally, building deep endpoint security and identity-management expertise across Microsoft 365 services.
- Resolved Tier-2 issues spanning identity access, password resets, MFA setup, and conditional-access policies; configured Active Directory permissions and assisted with Intune deployment and patch enforcement.
- Automated recurring support workflows in PowerShell, reducing manual ticket-handling time and improving first-response SLAs.
- Coordinated with internal security teams to maintain endpoint compliance and system hardening.

Student Library Assistant (Research & Information Support) — *Oklahoma City University · Part-time* Sep 2023 – Apr 2025
Oklahoma City, OK · On-site

- Provided research and information-support services to students and faculty in a university library environment.
- Resolved patron-facing identity/access issues across Microsoft 365 services (Teams, SharePoint, Exchange, OneDrive).
- Documented common workflows to streamline future support and student onboarding.

IT Support & Systems Administrator — *Catholic Church of the Resurrection Magodo · Contract* 2014 – Jan 2021
On-site

- Provided Tier 1–2 IT support in a multi-user environment; managed helpdesk tickets and resolved endpoint, network, and access issues.
- Implemented basic security protocols, managed user access, and advised on procurement of secure IT equipment.

EDUCATION

M.Sc. Cybersecurity — Oklahoma City University	May 2025 · GPA 3.7 / 4.0
IT Support Graduate — Per Scholas	2024
Junior Cloud Practitioner — ChooseU	2022

TRAINING & CONTINUING EDUCATION

Cybersecurity Mentorship Program — Defensive Security Track — Cybersecurity Clarity Dec 2023 – Dec 2025
 Structured mentorship in defensive security fundamentals, ethical hacking, OWASP Top 10, and CTF-style lab scenarios.
 Capstone: automated OWASP Top 10 vulnerability tests in Python.

CERTIFICATIONS

CompTIA Security+ (in progress) · **Microsoft SC-900** (Security, Compliance & Identity) · **AWS Certified Cloud Practitioner**
 Google Cybersecurity Certificate · Microsoft 365 Fundamentals (MS-900) · Microsoft Azure Fundamentals (AZ-900) · Microsoft AI Fundamentals (AI-900)

PROJECTS & LABS

Adverse Insight (2026, Codex Creator Challenge submission) — Streamlit + OpenAI app chaining three AI agents to extract clauses from contracts, red-team-score them for hidden risk, and auto-draft negotiation scripts. Built in 48 hours.

AI Evaluation & Safety Portfolio (NDA-Compliant) — Public GitHub portfolio of selected AI red-teaming, evaluation, and safety workflows for peer review.

CodePath Applied AI Engineering Program — Admitted; focus on threat detection, security automation, and identifying vulnerabilities in AI-driven systems.

Hands-On Labs & Competitions — National Cyber League (NCL) 2023: log analysis, packet inspection, cryptography. TryHackMe & Hack The Box: SOC Level 1, Pre-Security, and Junior Penetration Tester paths completed. MSc Capstone: identified and remediated network vulnerabilities using Nessus and Nmap. Home Lab: Active Directory simulation with Windows Server, Ubuntu VMs, and M365 configuration.
